Ref: MCIA Solution Inc.

ADF Group Inc. retained the services of MCI solutions to develop an integrated production system, which could cater to our unique product and processes.

This challenging IT project required not only thorough knowledge of programming software, but also an expertise in the critical task of the analysis of our work flow and establishing the best computer model to suit our business needs.

MCIA have exceeded our expectations, in not only delivering a state of the art system, but in also meeting the development and deployment scheduled, all within the allocated budget.

A handwritten signature in black ink, appearing to read 'C. Hanson'.

Carolyn Hanson, M. Eng., PE  
VP Engineering and Operations, ADF Group Inc.
